Montreal, Canada – March 29, 2019

Veolia Water Technologies launches AQUAVISTA™, a complete digital solution that embeds optimization as a service

Veolia Water Technologies is a world leader in design, build, maintenance and modernization of water and wastewater treatment facilities and also provides a full range of standardized and customized products and services to industrial and municipal customers. Veolia is trusted by leading Food & Beverage companies across the globe and has successfully executed more than 1,200 projects worldwide.

The company unveiled its AQUAVISTA™ platform of digital services a few months ago, based on 20 years of expertise in intelligent software for water and wastewater facilities and backed by its unparalleled knowledge of water treatment. This new cloud-based platform allows industries and municipalities to manage their water treatment systems in a much smarter and more efficient way over a period of time, letting them focus on their core business. Veolia Water Technologies is currently working on making all of its technologies and equipment Aquavista-enabled.

Press release

AQUAVISTA™ Plant is a holistic digital solution for real-time optimization of process performance. It provides a state-of-the-art auto-pilot to optimize the whole wastewater system, including sewer network and treatment plant. AQUAVISTA™ Plant focuses on real-time automated optimization of the consumption of energy and chemicals, biological and hydraulic capacity enhancement, stable operation and compliance of wastewater treatment plants and sewer networks. It is suitable for existing or new, large or small, industrial or municipal water treatment plants for all applications: drinking, waste and process water.

Best-in-class security is fully integrated at every level of AQUAVISTA™, from data acquisition and transfer to aggregation, analysis and reporting. Veolia Water Technologies is committed to protecting the integrity of physical devices, networks, programs and data from attack, damage, or unauthorized access.

Veolia group is the global leader in optimized resource management. With over 171,000 employees worldwide, the Group designs and provides water, waste and energy management solutions which contribute to the sustainable development of communities and industries. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources, and to replenish them.

In 2018, the Veolia group supplied 95 million people with drinking water and 63 million people with wastewater service, produced nearly 56 million megawatt hours of energy and converted 49 million metric tons of waste into new materials and energy. Veolia Environnement (*listed on Paris Euronext: VIE*) recorded consolidated revenue of USD 30.6 billion in 2018. www.veolia.com
